

## Drivers for Performance Building a Pro-Environment Culture in your Company

AWIEC Conference  
Adelaide, September, 2009  
Presented by Alex Wright

### Voyager Estate Environmental Philosophy:

"It is our moral obligation to preserve our environment and it is great business to produce a healthy product. We believe the more alive the environment, and the soil and fruit that exist in that environment, the better the regional character of the wines will be and that educated and appreciative customers will develop a stronger relationship with our brand."

### The Voyager Estate Environmental Experience

### Waste Water Treatment Plant

Guinea Fowl roaming for Garden Weevil and Mealy Bug

Dacron Collars for trapping insects

Dam spillway revegetation

Revegetation programme - BEFORE

Revegetation programme - PREPARATION
